

VENDOR/SHRINK SUPPORT

End-to-End Investigation and Deep-Dive

AI GENERATED

THE PRINCIPLE

Vendor relationships and inventory shrinkage require transparency if profitability across the retail network is to hold up. Our Vendor and Shrink Support service gives suppliers and retailers a framework for root cause investigation, built to resolve complex discrepancies that arise late in the supply chain. When shrinkage rises or disputes recur at store of contribution level, assumptions are no longer enough, and our independent audits establish where the operational breakdowns behind the loss actually sit.

The service runs alongside our Ascend™ Service as a Solution (SaaS) model, which equips vendors and retailers to carry out detailed operational analysis with expert guidance and established diagnostic kits. Internal teams can investigate systemic weaknesses, address late-stage friction in the supply chain and put preventative controls in place, without adding administrative burden. We close the gap between upstream production and what happens in store.

The service turns shrinkage management from a point of friction into a shared improvement stream. We establish why exceptions occur downstream and set the findings alongside the intelligence in the RAS Prosper™ dashboard, so everyone involved can protect margin, reduce disputed claims and build operational trust across the retail network.

THE PROVISION

Managing shrinkage and resolving complex supplier disputes requires more than surface-level reporting; it demands deep operational insight into late-stage supply chain failures. RAS Supply Chain Integrity delivers a specialised root-cause investigation service designed to diagnose vulnerabilities occurring downstream, offering robust end-to-end support for vendors and retailers alike.

- **End-to-End Investigation:** Comprehensive root-cause analysis tracing shrinkage and discrepancies back to their true operational origins.
- **Ascend™ Integration:** Seamlessly links with our Service as a Solution model to provide powerful deep-dive audit opportunities for internal teams.
- **Downstream Focus:** Specifically engineered to solve complex issues occurring later in the supply chain, at store and distribution hand-offs.
- **Prosper™ Diagnostics:** Leverages real-time platform data to give vendors and retailers clear, objective visibility into recurring exception trends.
- **Collaborative Resolution:** Replaces contentious dispute management with evidence-based insights that strengthen commercial partnerships

KEY BENEFITS

- **Precision Shrink Reduction:** Identifies and resolves the hidden root causes of downstream inventory loss.
- **Enhanced Vendor Trust:** Replaces friction and disputed claims with transparent, verifiable data.
- **Actionable Intelligence:** Delivers clear, data-led insights that prevent recurrence and protect operating margins.
- **Deep-Dive Capability:** Empowers internal teams through Ascend™ integration to conduct rigorous operational deep-dives.
- **Downstream Control:** Directly tackles complex challenges occurring in the final stages of the supply chain.

“Shrinkage is not an inevitable cost of doing business; it is an unsolved operational puzzle. We give you the tools and the truth to solve it.”
