

HOLISTIC SUPPLY CHAIN ASSURANCE

Closing the Visibility Gap

AI GENERATED

THE PRINCIPLE

Stop managing symptoms and start addressing root causes. From supplier pick to store delivery, our End-to-End Intelligence brings together data from every audit point to give you a clear view of how your supply chain is performing. We connect the individual findings into a single account of where your stock is going wrong.

Most retailers work with fragmented visibility. Logistics teams see delivery performance, procurement sees supplier pricing and store teams see availability gaps, but no one sees the whole connected picture. RAS Supply Chain Integrity closes those gaps and provides the intelligence you need to see the leaky pipe for what it is.

By bringing our individual audit streams together, we create a layer of strategic oversight. We identify the systemic trends behind repeated failures: the supplier, the lane, the product category. That moves you from reactive firefighting to planned, system-wide improvement.

THE PROVISION

Disparate audit data leads to fragmented decision-making. RAS Supply Chain Integrity integrates intelligence across the entire supply chain to drive system-wide transformation. With nearly **7 million cases handled weekly**, our data proves that when you start measuring accurately, everything else – from replenishment to forecasting – improves.

- **Unified Insight:** Aggregates data from GFR, Pick Accuracy, LA, Marshalling, and DTS into a single strategic view of operational health.
- **Root-Cause Attribution:** Identifies exactly where in the chain stock or process issues originate.
- **Strategic Optimisation:** Equips leadership with the evidence needed to drive sustainable, cross-functional improvements.
- **Predictive Intelligence:** Identifies recurring failure patterns, allowing for proactive intervention.
- **Measurable Impact:** Provides the tracking required to see the tangible Return on Investment of integrity reforms across the supply chain network.

KEY BENEFITS

- **System-Wide Control:** Moves from siloed management to end-to-end supply chain visibility.
- **Informed Strategy:** Decisions are based on total-chain data, not local departmental metrics.
- **Accelerated ROI:** Identifying the 'Leaky Pipe' across all zones compounds savings (potential for 4x ROI).
- **Trust and Integrity:** Creates a single version of the truth for retailers and suppliers, improving relationship experience by up to **73%** in supplier/retailer interactions.

**“A chain is only as strong as its weakest link.
End-to-End Intelligence shows you exactly where that link is.”**
