SUPPLY CHAIN INTEGRITY

TARGETED SLOT VALIDATION

Ensuring Pick Slot Integrity

AI GENERATED

THE PRINCIPLE

Your pick slots are the critical interface between your DC and your stores. If the product is not where it should be, or if the inventory level is wrong, the pick cycle is broken. Our Bay Check service provides targeted, frequent verification of slot accuracy and confirms that the right product is in the right location, in the right quantity.

This is precision auditing at slot level. Unlike general counts, our Bay Checks are fast, responsive and focused on your highest-velocity lines. We provide daily oversight of your pick faces and catch errors long before they reach your stores as failed deliveries.

Accurate pick slots cut the time your pickers spend hunting for stock, speed up order fulfilment and support your store service levels. Our teams provide data you can act on, so you can manage your pick environment with confidence.

THE PROVISION

Pick slot integrity is the essential prerequisite for operational speed and accuracy. RAS Supply Chain Integrity Bay Checks ensure that your WMS is a reliable map.

- **Precision Focus:** Dedicated, frequent auditing of pick slot contents, availability, and unit counts.
- **Operational Readiness:** Eliminates 'hunting' and 'not-found' errors, significantly improving picking speed.
- **Store Service Levels:** Directly impacts availability by ensuring the right product is consistently in the right location for the picking.
- **High-Frequency Insight:** Provides rapid, daily feedback on slot status, supporting a more responsive DC environment.
- **Exception Reduction:** Drastically reduces the time spent on exception handling and manual stock adjustments.

KEY BENEFITS

- **Picking Efficiency:** Drastically reduces picker downtime and 'search' time.
- **Improved Throughput:** Speeds up order fulfilment by ensuring slot availability.
- **Exception Reduction:** Minimises time spent on exception handling and manual adjustments.
- **Operational Confidence:** Keeps the warehouse floor running smoothly without surprises.

**"A picker who can't find a product is a failure of integrity.
Bay Checks keep your DC moving by keeping your data honest."**
