

REGULATED PRODUCT RECOVERY

Security, Compliance, and Certified Disposal

AI GENERATED

THE PRINCIPLE

Legislative shifts, range changes, and product recalls demand precise handling of sensitive items like tobacco and vapes. Our specialist recovery service ensures accurate identification, controlled processing, and fully compliant disposal. With secure tracking and certified destruction, we mitigate the immense regulatory and financial risks associated with high-value, highly sensitive inventory.

We understand that these products are not just high value; they are heavily regulated. A mistake in the return process, whether in identification, documentation, or disposal, can lead to legal and reputational damage. RAS Supply Chain Integrity provides the expertise to handle these returns with the required rigour, ensuring that every packet is accounted for and handled according to the latest legislation.

Through our secure chain-of-custody, we offer peace of mind. Our auditors manage the process from end-to-end, providing visibility at every step. Whether you are dealing with range changes or complex regulatory updates, our service ensures that your inventory recovery is as secure as it is compliant.

THE PROVISION

High-value, highly regulated, and time-critical: tobacco and vape returns require a specialised solution that standard reverse logistics cannot provide. RAS Supply Chain Integrity delivers a secure, audit-trail-backed service.

- **Regulatory Expertise:** Expert identification of products subject to legislative changes, range modifications, or product recalls.
- **Secure Handling:** Full end-to-end management from product identification to secure transportation and destruction.
- **Certified Disposal:** Provides official, verifiable certificates of disposal, ensuring complete compliance with environmental and trade laws.
- **Risk Mitigation:** Reduces the risk of theft and illegal re-entry of regulated products into the market.
- **Operational Agility:** Designed to mobilise rapidly during range changes or legislative updates, minimising the administrative burden on your internal teams.

KEY BENEFITS

- **Absolute Compliance:** Eliminates regulatory risk through robust process control.
- **Brand Protection:** Ensures high-value products are handled securely, protecting against reputational damage.
- **Operational Speed:** Designed to mobilise rapidly during range changes or legislative updates.

“In the world of regulated products, ‘close enough’ is not an option.
Certainty is the only currency.”
