

EMPOWERED IN-HOUSE AUDITING

The RAS Pedigree, Internalised

AI GENERATED

THE PRINCIPLE

Want to run audits in-house but lack the framework? Ascend™ is our SaaS model, providing the kit, the processes and the training you need. Our methods rest on 30 years of practice, and we equip your team to run effective daily audits with low administrative overhead. We provide the tools, you provide the resource, and together we secure your supply chain.

Integrity should not depend on whether you have external auditors on site every day. Our SaaS solution opens up the same standard of audit insight to your own people. We train your teams, deploy our established auditing kit and connect you to the RAS Prosper™ dashboard, so you have daily, reliable visibility of your audit performance.

This is service as a solution in practical terms. It combines the rigour of our 30-year audit record with the flexibility of an internal team. You get a tried and tested system, mobilised quickly and sustained at low cost, and you keep control of your integrity function.

THE PROVISION

Combine RAS Supply Chain Integrity expertise with the convenience and responsiveness of your own resources.

- **Proven Framework:** 30 years of operational experience packaged into a ready-to-run, compliant auditing solution.
- **Fast Mobilisation:** Rapid deployment of auditing tools, processes, and customised training programmes.
- **Cost-Effective Daily Support:** Enables a sustainable, high-integrity audit function managed internally.
- **Operational Control:** Gives you total control over the frequency and focus of audits, allowing for immediate response to emerging issues.
- **Prosper™ Integration:** Full access to our industry-leading dashboard for real-time reporting.

KEY BENEFITS

- **Control:** Total autonomy over audit schedules, focus, and team deployment.
- **Operational Speed:** Immediate response capabilities for auditing needs.
- **Sustainability:** Builds long-term, high-integrity capabilities directly into the business.
- **Proven Results:** Uses the same tried-and-tested frameworks that RAS Supply Chain Integrity uses worldwide.

“Expertise shouldn’t always have to be imported. We give you the tools so you can run the audit yourself, with our 30 years of experience as your foundation.”
